We are taking today of a republican in Canada. Dr. Crawford is reported to have declared.

According to the New York Times reporter, the Queen didn't applaud when Lindsay Crawford, a native of Ulster and formerly a protestant, addressed the House of Commons at the end of the debate on the eighteenth century.

The problem for Ireland, Canada, Australia and South Africa, Dr. Crawford said, is the problem of imperialism in the twentieth century.

He said it is impossible to avoid a system of imperialism, but it can fully express itself within an empire, and unless England can find such a system, the empire will not last.

Hundreds of banners and signs, most of them uncompromising to Great Britain, were carried in yesterday's parade. The one which made the greatest hit with the spectators was the one which bore the legend, "Give me liberty or give me death" and underneath them, "memorable words were uttered."

The figures include 466 deaths from influenza and 190 from pneumonia, and the average weekly M.R.O. did not represent a fair comparison with other years. The toll of life from influenza this year was only half that of the year before.

The report showed that whereas last year the ages at which the epidemic reached its maximum were 20 to 28, this year the greatest risk was at ages over sixty.

## NATIONALIST UPRISING IN TURKEY IS REPORTED

Headed by Commander in Thrace, Who Has Established Government at Adrianople

British and French Refuse Recognition of Feisal as King

London, March 18.—A great Nationalist uprising in Turkey is reported to-day. Col. Jartaray, commanding officer of the British forces in Adrianople, has established an independent Government at Adrianople.

The uprising is not known here, but it is believed the situation in Turkey is more serious than the one existing in Armenia.

Later this evening it was learned that the Nationalist movement is spreading to the south, and that Col. Jartaray had issued a proclamation denouncing the armistice between Turkey and the Allies, and calling upon the formerly Allied countries and resistance to any peace terms not acceptable to the Turkish Nationalists.

### THE LOVED AND LOST.

Some Famous Men Who Had Their Romances.

A story is told, for instance, of how a young doctor named Davis was once approached by a humble sergeant in the French army with an offer to marry him. Davis refused, and the sergeant was ejected.

As the years went by, the obscure sergeant rose by degrees until he became a general, and was sent to Fleurus, Connaught, Austria, and Waterloo. What must the woman, who years before, had accepted his offer, have thought when she heard men speak of the mighty exploits of the Maréchal Ney?

The Empress was everywhere by Wellington, she was living a pitiable peasant life in the Quai de Conti, Paris, when she was a girl of 18. She raised her eyes to the fair and comely daughter of a city banker, and the girl hastened to her side, this time, instead of saying "no," her answer was just the opposite.

### Steel and Iron.

Steel is a kind of metal which can easily be heated and made thin without cracking and can be made thin by being heated and then cooled quickly. It is a different form of carbon steel because the amount of carbon in it is wrought iron contains less carbon than steel and so it cannot be beaten with a hammer.

Steel is made from cast iron containing more carbon and so it is brittle and so is brittle.

The women who wear extremely low cut gowns evidently have no fear of the backbiter.

## INSTRUCTED TO ADVERTISE THE TREASURERSHIP

City Will Ask Applicants to State Qualifications and Salary.

## A WARM DEBATE

Motion Made for Appointment of Present Assistant Treasurer.

Though the City Council, at a special meeting last evening, accepted the resignation of W. R. Leslie as City Treasurer, no action was taken as to the appointment of a successor, other than referring the matter back to the Board of Control. Mr. Leslie, however, maintained that the vacancy must be filled. Controller Jutten, when this question was raised by Alderman Radigan, questioned as to whether only applications received in response to the advertisements were to be considered, or if those who were qualified, that the Board of Control should be able to consider the names also, of those recommended by the position that might be recommended to the board by any members of the community.

Mr. Leslie, in tendering his resignation, asked to be relieved of his duties on the first of April, but at nightfall, it was proposed by the Board of Control that his resignation take effect on the first of May, but it was stated that he was willing to remain to render assistance to his successor, if he would do so, for the date, if this was considered necessary.

"Does it mean that Mr. Leslie would be willing to instruct Mr. Davis, were he appointed, considering that Mr. Leslie is getting only \$2,300, while Mr. Davis is getting \$3,000, or \$3,000?" queried Alderman Newlands.

"Does it mean that the responsibility of the position, and the responsibility that rests on the council in selecting a successor for Mr. Leslie, might be recognized?" said Alderman Newlands. "And while we feel that efficient economy of the city should get promotion when it is due, I think that if it is necessary to go outside the city to find a man to get a man qualified for this position that action should be taken. But the council should also be broad-minded enough to give a man a chance to apply for this position."

Controller Jutten then took up the discussion, reverting once more to the question of the board's responsibility. "I am afraid that Mr. Leslie had been approached regarding the matter. It has always been my custom, and I am sure it is the custom of all men, to satisfy myself that the man for the position would be qualified. At this juncture, however, I am not able to advise what action should be taken. And for this reason I don't think we should take a man, a selected person, without advertising, and giving every man a chance to apply for this position."

Controller Jutten then took up the discussion, reverting once more to the question of the board's responsibility. "I am afraid that Mr. Leslie had been approached regarding the matter. above all, the men who goes the apartment, must be fully qualified. A motion was proposed by Alderman Farnside and Garry that Thomas Farnside and Garry be appointed to the Board of Control, and that the Board of Control be directed to make application to the Board of Control for the appointment of a suitable person to fill the position.

Controller Jutten then took up the discussion, reverting once more to the consideration of increases for the rest of the salaried officials. "I am not in a position to say that a man for me is a suitable one," he said.

### DO NOT NEGLECT THE BEES.

The present high price of sugar makes the bees more valuable than ever. Natural sugars that are still more valuable than the product of the refineries. The bees are not yet dead, but understand them and have supplied their needs.

The early spring months are the most critical period of the year in which the bees are in full activity. All the time during the month of April is spent in the work of cultivating, sowing, etc., on every farm day.

There are several reasons why the bees are more liable to be neglected than the other animals. They are more difficult to keep away from the flowers, and the bees are more likely to be disturbed.

Interesting Interview On Relations of the Company and the Men.

Harold F. McCormick, president of the International Harvester Company and a vice-president and manager of the industrial relations department of the company arrived in Hamilton from Chicago yesterday morning and were the guests of the Rotary Club at luncheon.

In the course of his visit to the group, Mr. McCormick said that he was here to visit the workers' committee and found that the main object of the visit was for the purpose of meeting the foremen of the various departments with a purpose of discussing in detail the conditions of the workers. In the 23 plants controlled by the company, there are 22 committees of workers. On the committees are an equal number of workers and men at the heads of the departments, and everybody runs his fifty-cent piece. The chairman has not the deciding vote, and any matter on which there is a dead lock is referred to him. He said that on only one occasion has there been a matter which had to be referred to the president.

At the meetings of the committees, questions of hours for the workers, wages, etc., come in for full discussion, and the committee and department heads show their full hand. When asked about the local problems, Mr. McCormick said that the president of the International Harvester Company, the president said that the plant is now doing about 80 per cent business, that it was before it was taken over by the International. The increase of employees is between 33 and 35 per cent.

Mr. McCormick stated that the Russian office of the International Harvester Company was once more put in full operation when permission was received by the United States Government to do so. The uprising of the Bolsheviks the company had a large business in the market of farm implements in Russia.

The president was of the opinion that the spirit of the Rotary Club was to help the people of Canada and the United States. It was the first Rotary meeting he ever attended, but the spirit shown by this club was to him a killing blow.

In the last edition of the "Toronto Star" Mr. McCormick was quoted as having said that Senator Joseph Madill McCormick, of the International Harvester Company, would like to keep the Canadian League of Nations, while he favored the entry of several negro states, such as Texas, Mr. McCormick wanted it to be known that he supported the League of Nations.

There is also the possibility that Mr. McCormick will go to Brantford to face the two counts which have been preferred against him there.

MOUNTAIN HOLD-UP

William Copeman Accused of That, Too.

When William Copeman, who is at present held for trial in High Court on three counts of shooting and robbing, was released on bail yesterday, he said his troubles may not be over.

Copeman, it is alleged, escaped from prison on May 1 last January, and, eventually, after a week, was recaptured in this city. On his way here, he is alleged that he broke into two houses and stole \$100 worth of silver. He believed to have been stolen by him from those houses have been discovered.

He was yesterday further identified as the man who held up Lambert's grocery store, on Concession street, at Midland, and made a safe getaway. Unfortunately, he removed the mask which he wore when he held up the store, just after leaving, and thus made Mr. Lambert and his son, very nervous.

There is also the possibility that Mr. Copeman will be brought to face the two counts which have been preferred against him there.
